WIDE APPLICATION

Illumination Incubator is applied for the following cases such as botanic growth tissue culture experiment for seeds in bud, botanic planting, insect and puppy breeding, microorganism and antibiotic culture, storing and the others constant temperature and luminous test.

Temperature Fluctuation Sheet:

DRYING OVEN

Characteristics:

LABORATORY INCUBATOR

- It is the double screen and high luminance charactron display, the display data is exactly and direct- viewing ,and the performance is superiority.
- It has the timing device,which can be used for timing setting.
- Programmable luminescence controlling system is available, subsection controlling can be achieved. (six sections luminescence controlling)
- Independent ultra-high temperature protection equipment and working state hint make the user more safety and reliable.
- The refrigerant adopts environmental protection fluorine free refrigeration.
- Cycles range from 0 to 100, a maximum of 30 programs can be changed within a cycle.

Inner Chamber	Mirror stainless steel						
Outer Shell	Cold rolling steel electrostatic spraying exterior						
Insulation Layer	High quality rock wool board						
Heater	Ferrochrome wire						
Test Hole diameter	40mm						
Water outlet diameter	8mm						
Safety Device	Independent ultra-high temperature protection equipment and working state hint						
	Environmentally friendly cfr -free refrigeration cooling airflow						
Optional Accessories	Independent alarm, 485 port, Printer port, LCD touch screen						
Programmable controller	The period ranges from 0 to 99. A maximum of 30 short programs can be changed in one period						
	Programmable luminescence controlling system is available, subsection controlling can be achieved. (six sections luminescence controlling)						
Additional Function	The product is equipped with a test port, which is convenient for testing						
	It has the timing device,which can be used for timing setting.
